SUMMARY

Full stack developer with two and a half years of production experience on React, Next.js, Node.js, Express and MongoDB. I like working across a whole feature: the database, the API, and the screen that uses it. Six of those months went into a pharmaceutical manufacturing ERP, where I worked on the masters, inventory, production, quality control and accounting modules. I design directly in Tailwind and CSS as I build, so what gets reviewed is close to what ships.

SKILLS

Languages: JavaScript (ES6+), HTML, CSS, C

Frontend: React.js, Next.js, Tailwind CSS, SCSS, Responsive UI, Design in code

Backend: Node.js, Express.js, REST APIs, JWT authentication, Middleware

Database: MongoDB, Mongoose, MySQL, Schema design, Aggregation

Integrations & tools: Razorpay, Stripe, Google OAuth, Socket.io, Nodemailer, Tally Prime, Git, GitHub, Postman, Vercel, Puppeteer

Media: CapCut, Canva, Filmora

EXPERIENCE

Full Stack Developer

Zyden IT Solutions

Oct 2025 – Aug 2026

Gandhinagar, India

- Worked on full-stack applications end to end, from the database schema and REST APIs through to the finished responsive interface.
- Helped build several large modules of an enterprise ERP in an industry I had never worked in, researching the domain myself before designing the data model and the screens.
- Wrote logic where correctness really matters, including balanced accounting ledgers, batch-level stock movement, and quality checks that stop unusable material moving further down the line.
- Built a one-click sync that copies accounting entries from the app into Tally Prime, created printable PDF reports from templates, added dashboards to admin panels, and fixed problems reported by real users.

Full Stack Developer Intern

Zyden IT Solutions

Apr 2025 – Sep 2025

Gandhinagar, India

- Learned the whole JavaScript stack on live client work instead of tutorials: React, Next.js, Tailwind, Node.js, Express, MongoDB and MySQL.
- Helped deliver customer-facing storefronts, admin panels and the APIs behind them, covering catalogue, cart, payments, authentication, delivery tracking and order management, and designed the interfaces as well as building them.
- Worked to client deadlines and picked up debugging, testing, code review and Git workflow in a team.

PROJECTS

TechCure

2025 – 2026

Pharmaceutical Manufacturing ERP · React.js · Node.js · Express.js · MongoDB · Puppeteer · Tally Prime

- Worked on the complete **Masters** area, covering products, items, raw and packing materials, formulas, parties, employees, HSN, TDS and QC monograms.
- Helped build **Inventory and Purchase**: supplier enquiries, purchase orders, goods receipt, stock adjustment and store-location tracking, with a movement trail kept behind every batch.
- Worked on the **Production** chain, including planning that reserves stock for earlier-dated plans and names the shortfall materials before a batch starts, then raw-material issue, post-production, packing-material issue and batch clearing.
- Contributed to **Quality Control**, where new stock stays blocked until its test report is approved. Blocked stock cannot be used in production or sold, and approving the report frees it automatically.
- Helped build the **Accounts** module on a double-entry engine, where every voucher posts balanced debit and credit legs by itself, so the trial balance and balance sheet always reconcile.
- Took part in adding **batch-level stock tracking** and **expiry tracking**, a worklist of unusable stock, the **BMR report**, and a **Tally Prime sync** that copies every accounting entry from the app into Tally at the click of a button, without creating duplicates.

House of Fashion

2025

Fashion e-commerce · Next.js · React.js · Node.js · Express.js · MongoDB · Razorpay · houseoffashion.co.in

- Worked across all three applications, the customer storefront, the admin panel and the API behind them, and helped with the interface design.
- Helped build the product catalogue, where one product can come in several sizes and colours and each combination keeps its own stock, along with wishlist, ratings, discount coupons and delivery charges.
- Worked on order tracking that shows each stage, and let customers cancel, return or replace an order themselves with a refund record kept against it, plus Google sign-in with email OTP and Razorpay checkout.
- Contributed to the admin dashboard with its sales charts, image cropping for product photos, manual invoicing and credit notes.

EDUCATION

B.E. in Information Technology

2022 – 2026

L. D. College of Engineering, Ahmedabad

CGPA: 8.84 / 10

Higher Secondary Certificate

2021 – 2022

M. M. Vasa Primary and High School, Ahmedabad

Percentage: 80.76%

LANGUAGES

English · Hindi · Gujarati
